

MURGILDU

A space for 3D, VR
and curious minds.

Create games and immersive experiences.
Explore graphics, AI and 3D modelling.

Degree (TFG) · Master's (TFM) · Practice

Faculty of Informatics · EHU
Lab E08 · Donostia–San Sebastián

MEET THE TEAM

Inigo Lopez-Gazpio

Unai Elordi

Elsa Fernández

Andoni Mujika

Borja Calvo

Igor Rodriguez

Eneko Atxa

One week. Your first XR game.

21–28 SEPTEMBER 2026

Build an AR or VR game in Godot.
The theme is revealed when the jam starts.

- 01 JOIN** Create an itch.io account and join the jam.
- 02 MAKE** Pick one mechanic and a supported XR platform.
- 03 SHARE** Submit your game, then play and rate other entries.

Templates and asset packs are welcome.
Start a new game for the announced theme.

Graphics technologies applied to healthcare

Make complex data easier to see, explore and understand.

From medical images to interactive 3D

VISUALISE

Reconstruct anatomy and explore medical scans, EEG or fatigue data.

INTERACT

Annotate in 3D and create immersive learning or simulated practice tasks.

EVALUATE

Compare tools and study how people understand and use the experience.

TFG / TFM · 3D modelling, VR, data visualisation and interaction

Inigo Lopez-Gazpio

inigo.lopez@ehu.eus

Unai Elordi

unai.elordi@ehu.eus

Elsa Fernández

elsa.fernandez@ehu.eus

Better use of space.

Arrange objects efficiently. Explore and improve the solution in 3D.

TFG · DEGREE PROJECT

Start with boxes

Build an interactive VR environment for packing rectangular objects into a container.

Andoni Mujika

andoni.mujika@ehu.eus

TFM · MASTER'S THESIS

Go beyond regular shapes

Explore irregular packing with optimisation methods and user interaction in 3D or VR.

Algorithms + AI + interaction

Bring your curiosity. Let's define the project together.
